

OPPS Task

Char operator

(int a, int b, double result)

argument acceptance

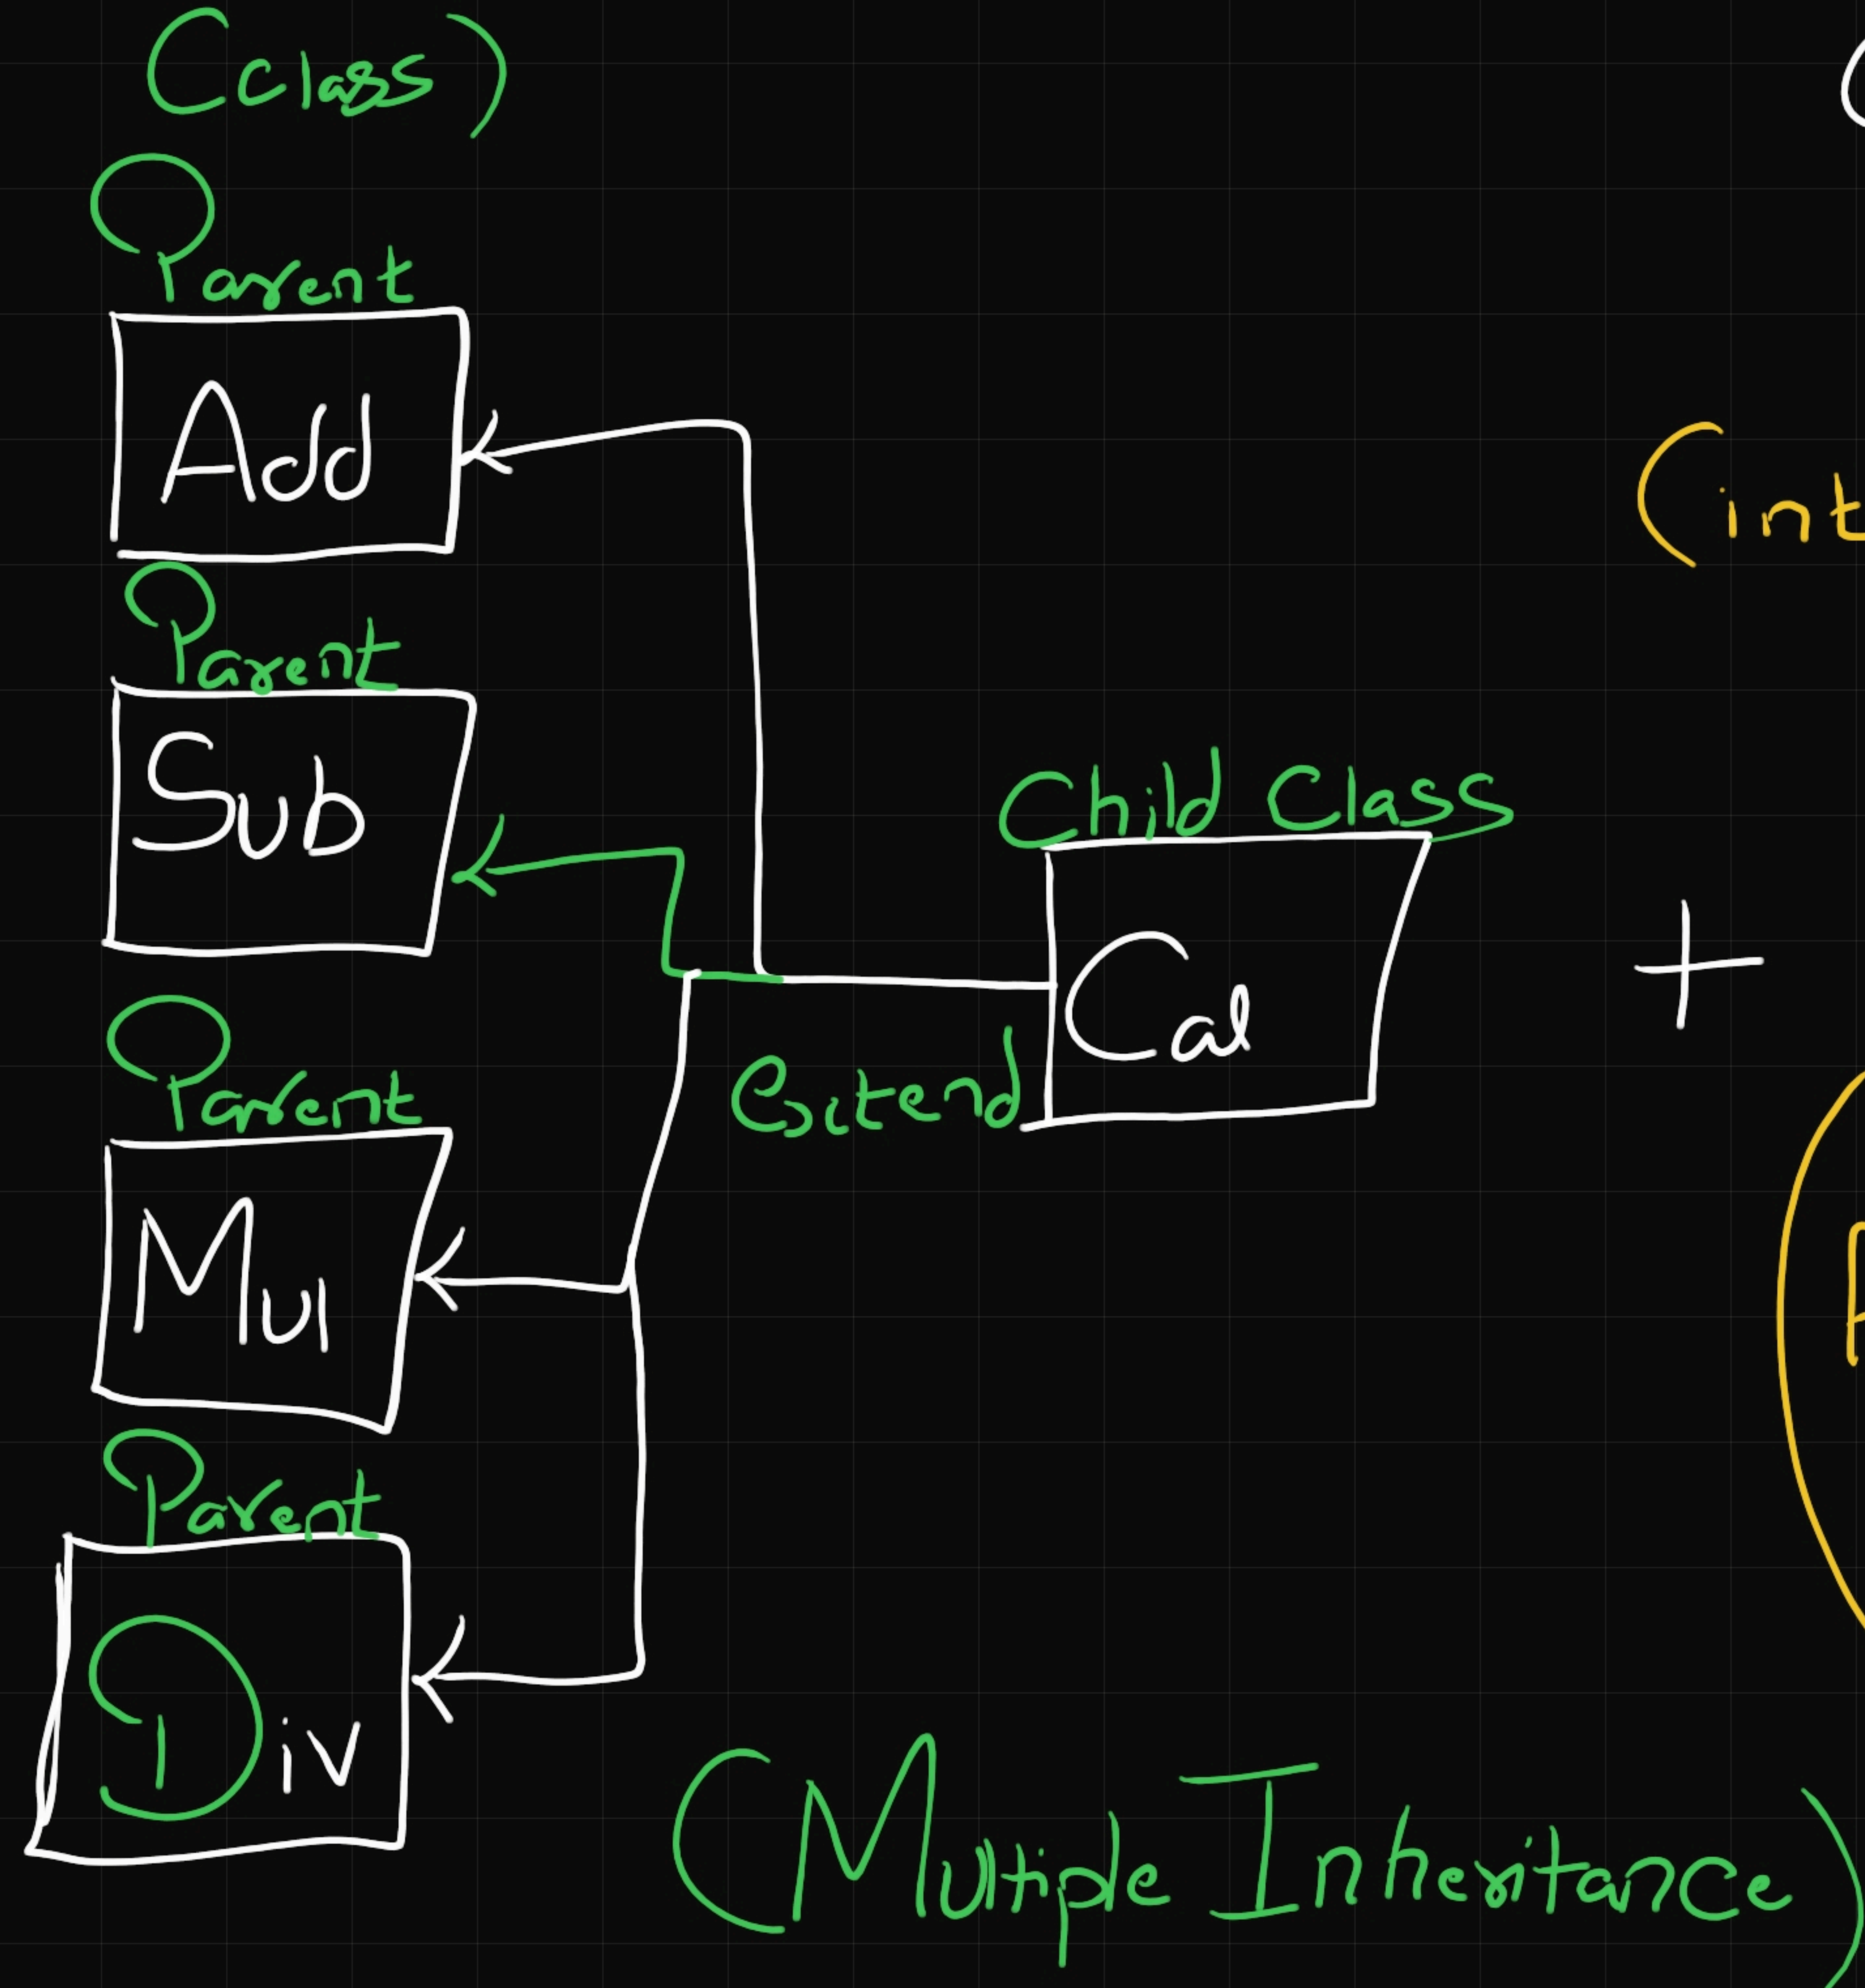

+ fileOperation

(Normal global function for write operation)

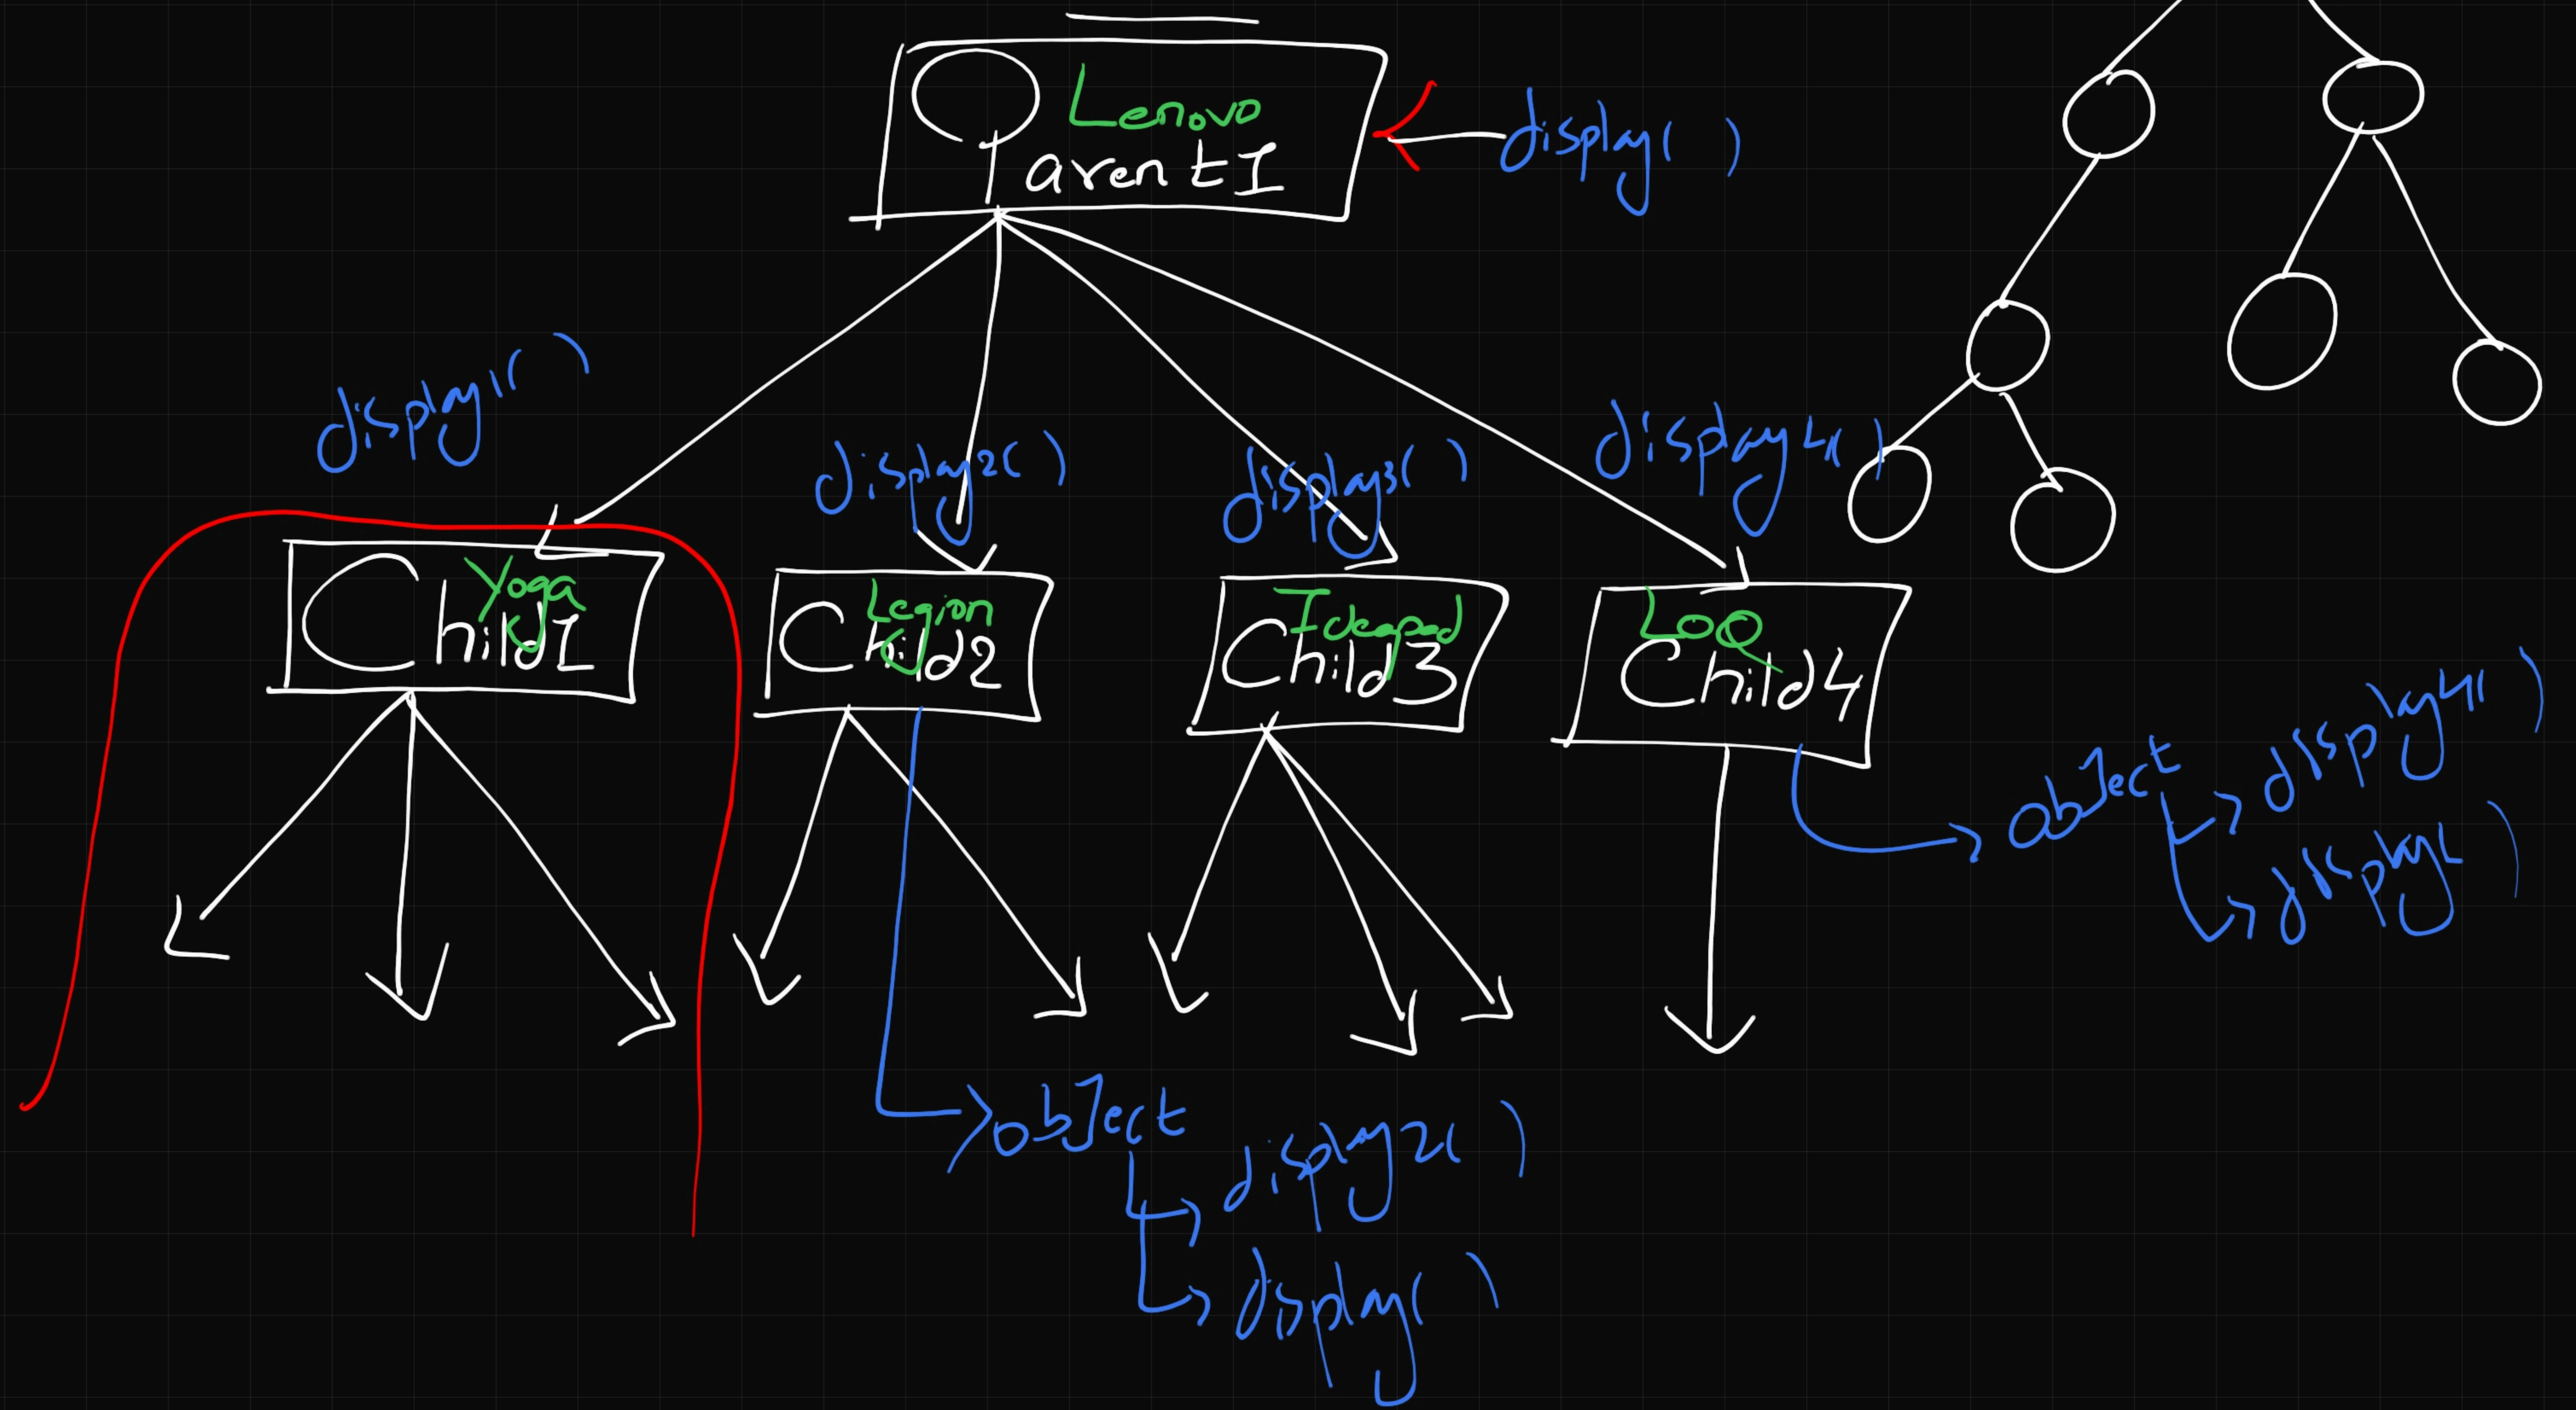

+ STL map template

map<String, int> m1 =
{
 { "Add", 0 },
 { "Sub", 0 },
 { "Mul", 0 },
 { "Div", 0 }
}

Use Case:- To count the frequency how many times Particular fn got called.

Hierarchical Inheritance

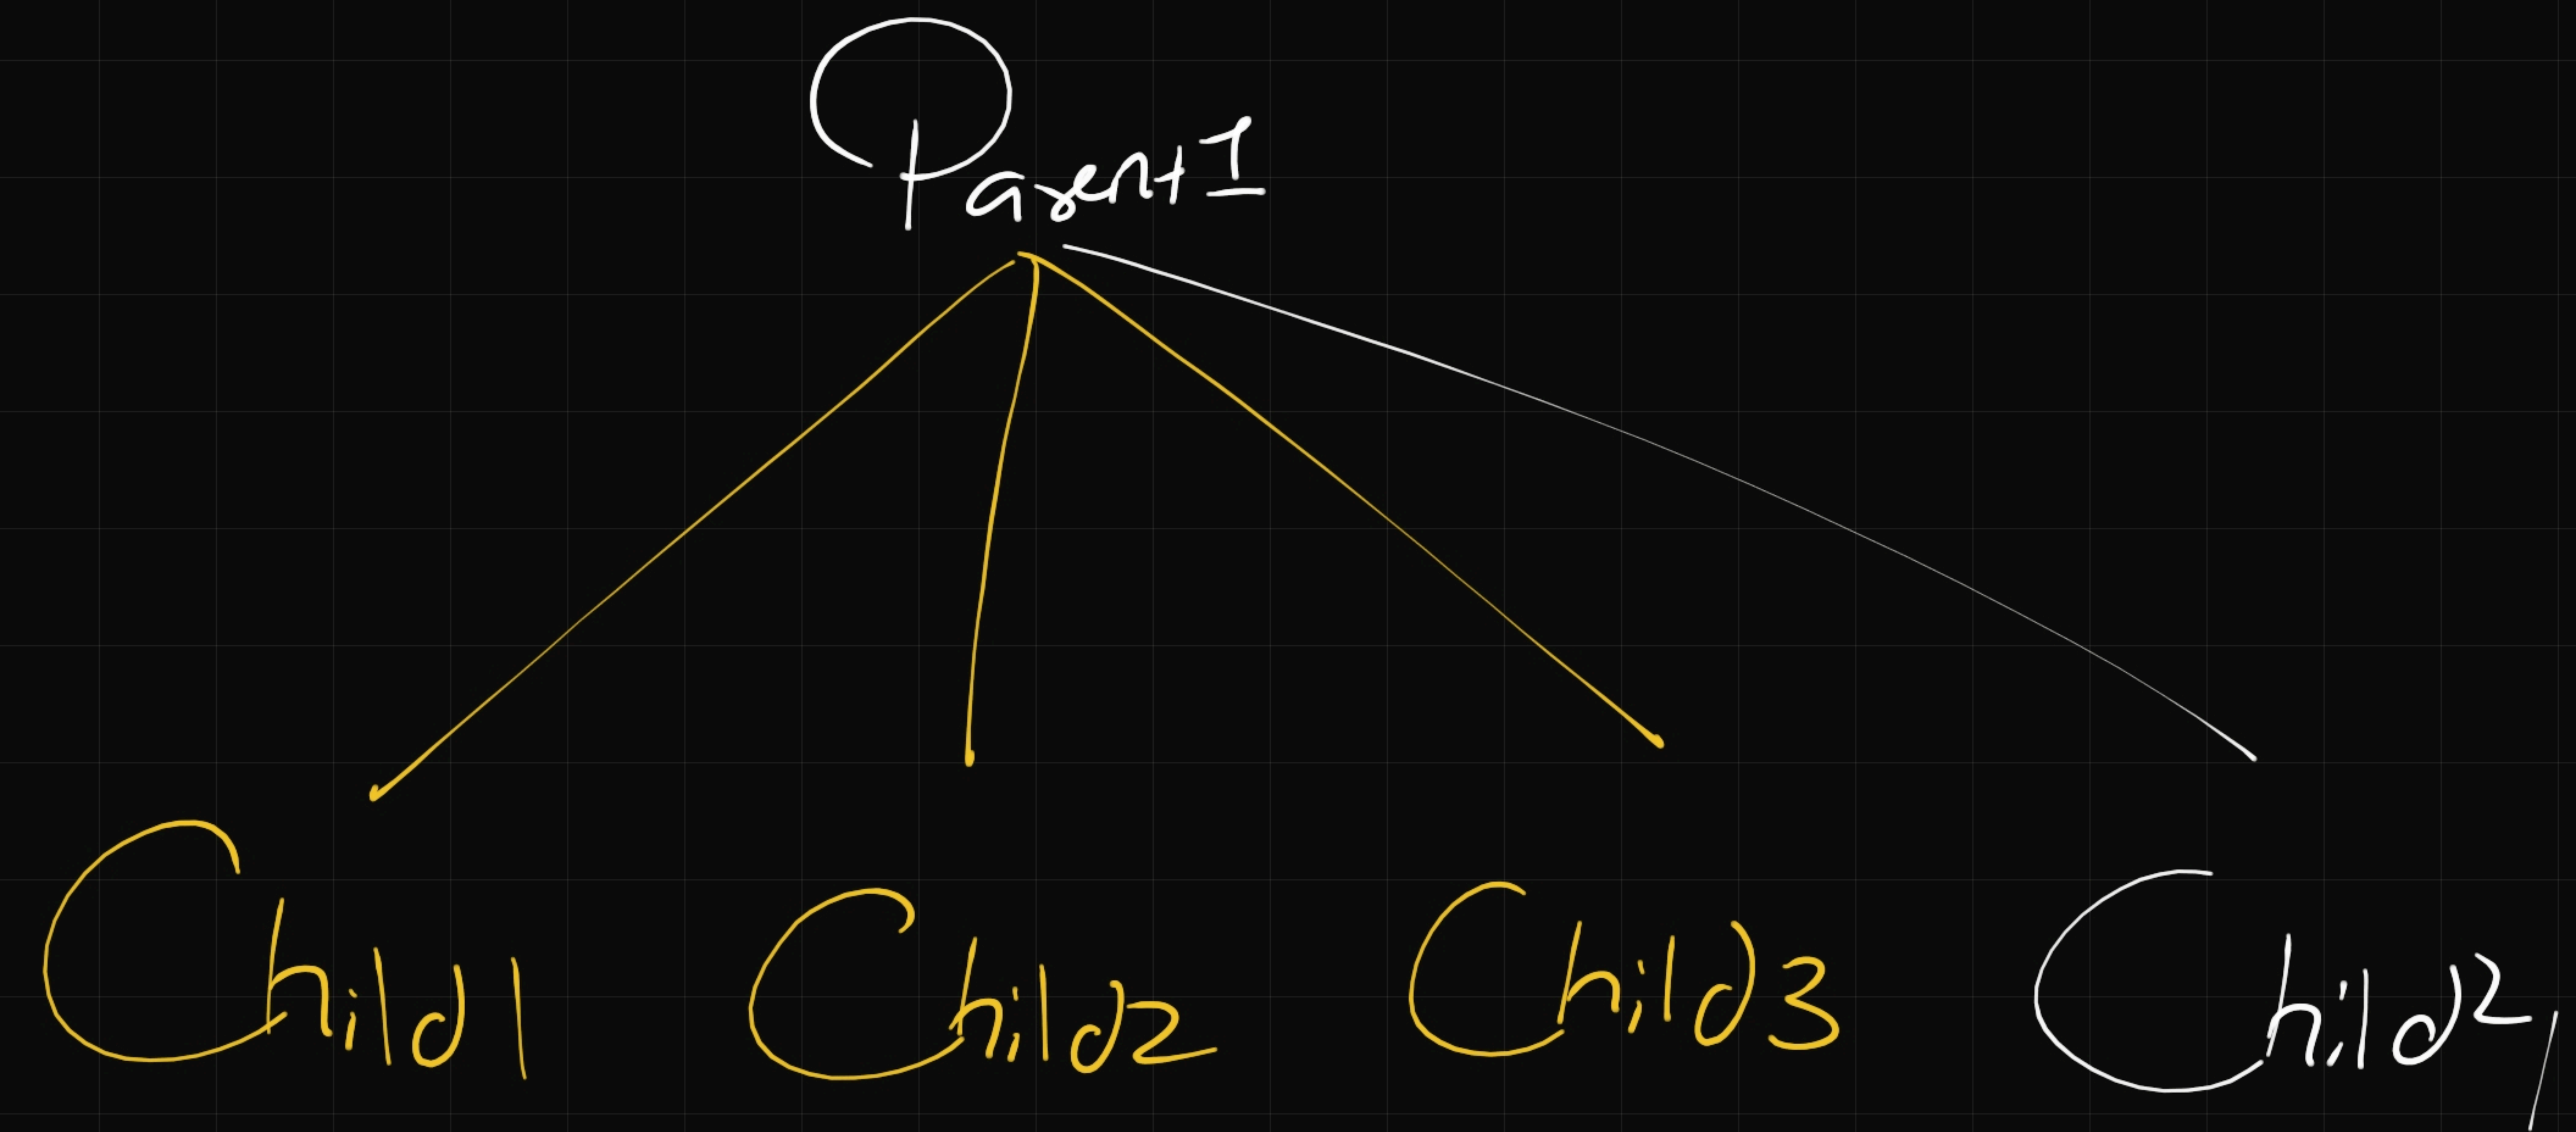

Class Lenovo {;

Class Yoga : Lenovo {;

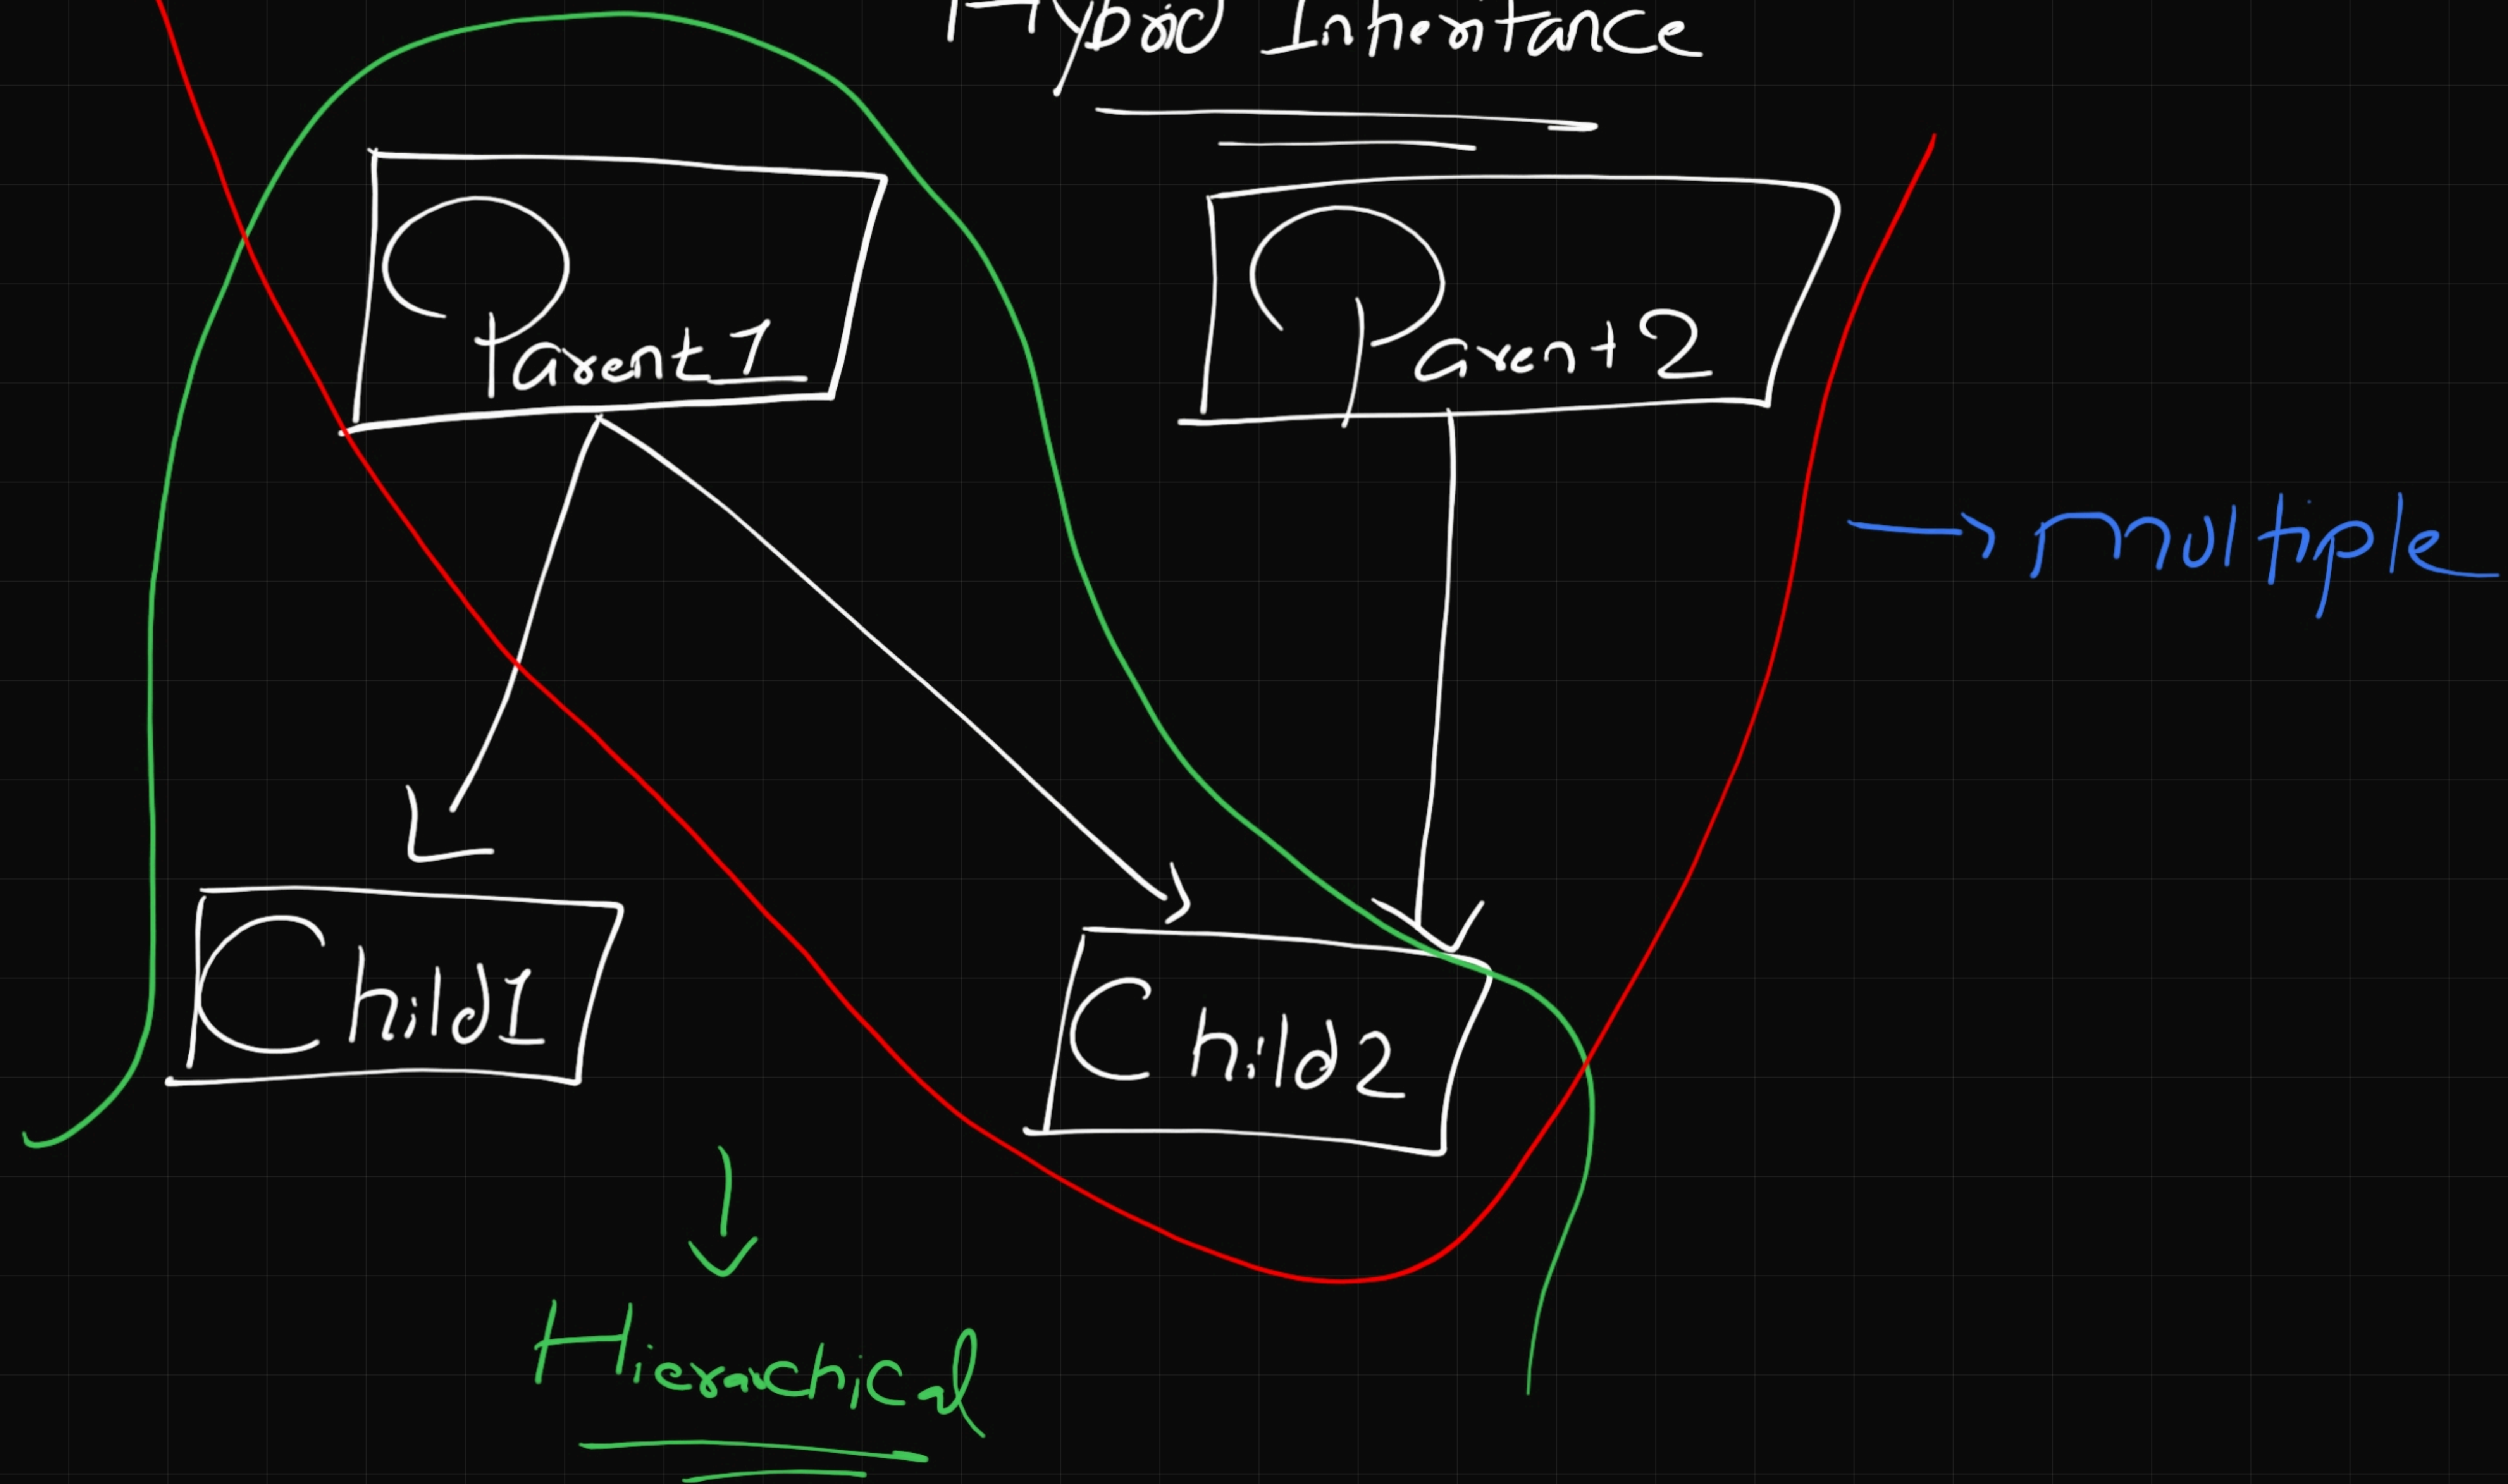

Class Ideapad : Lenovo {;

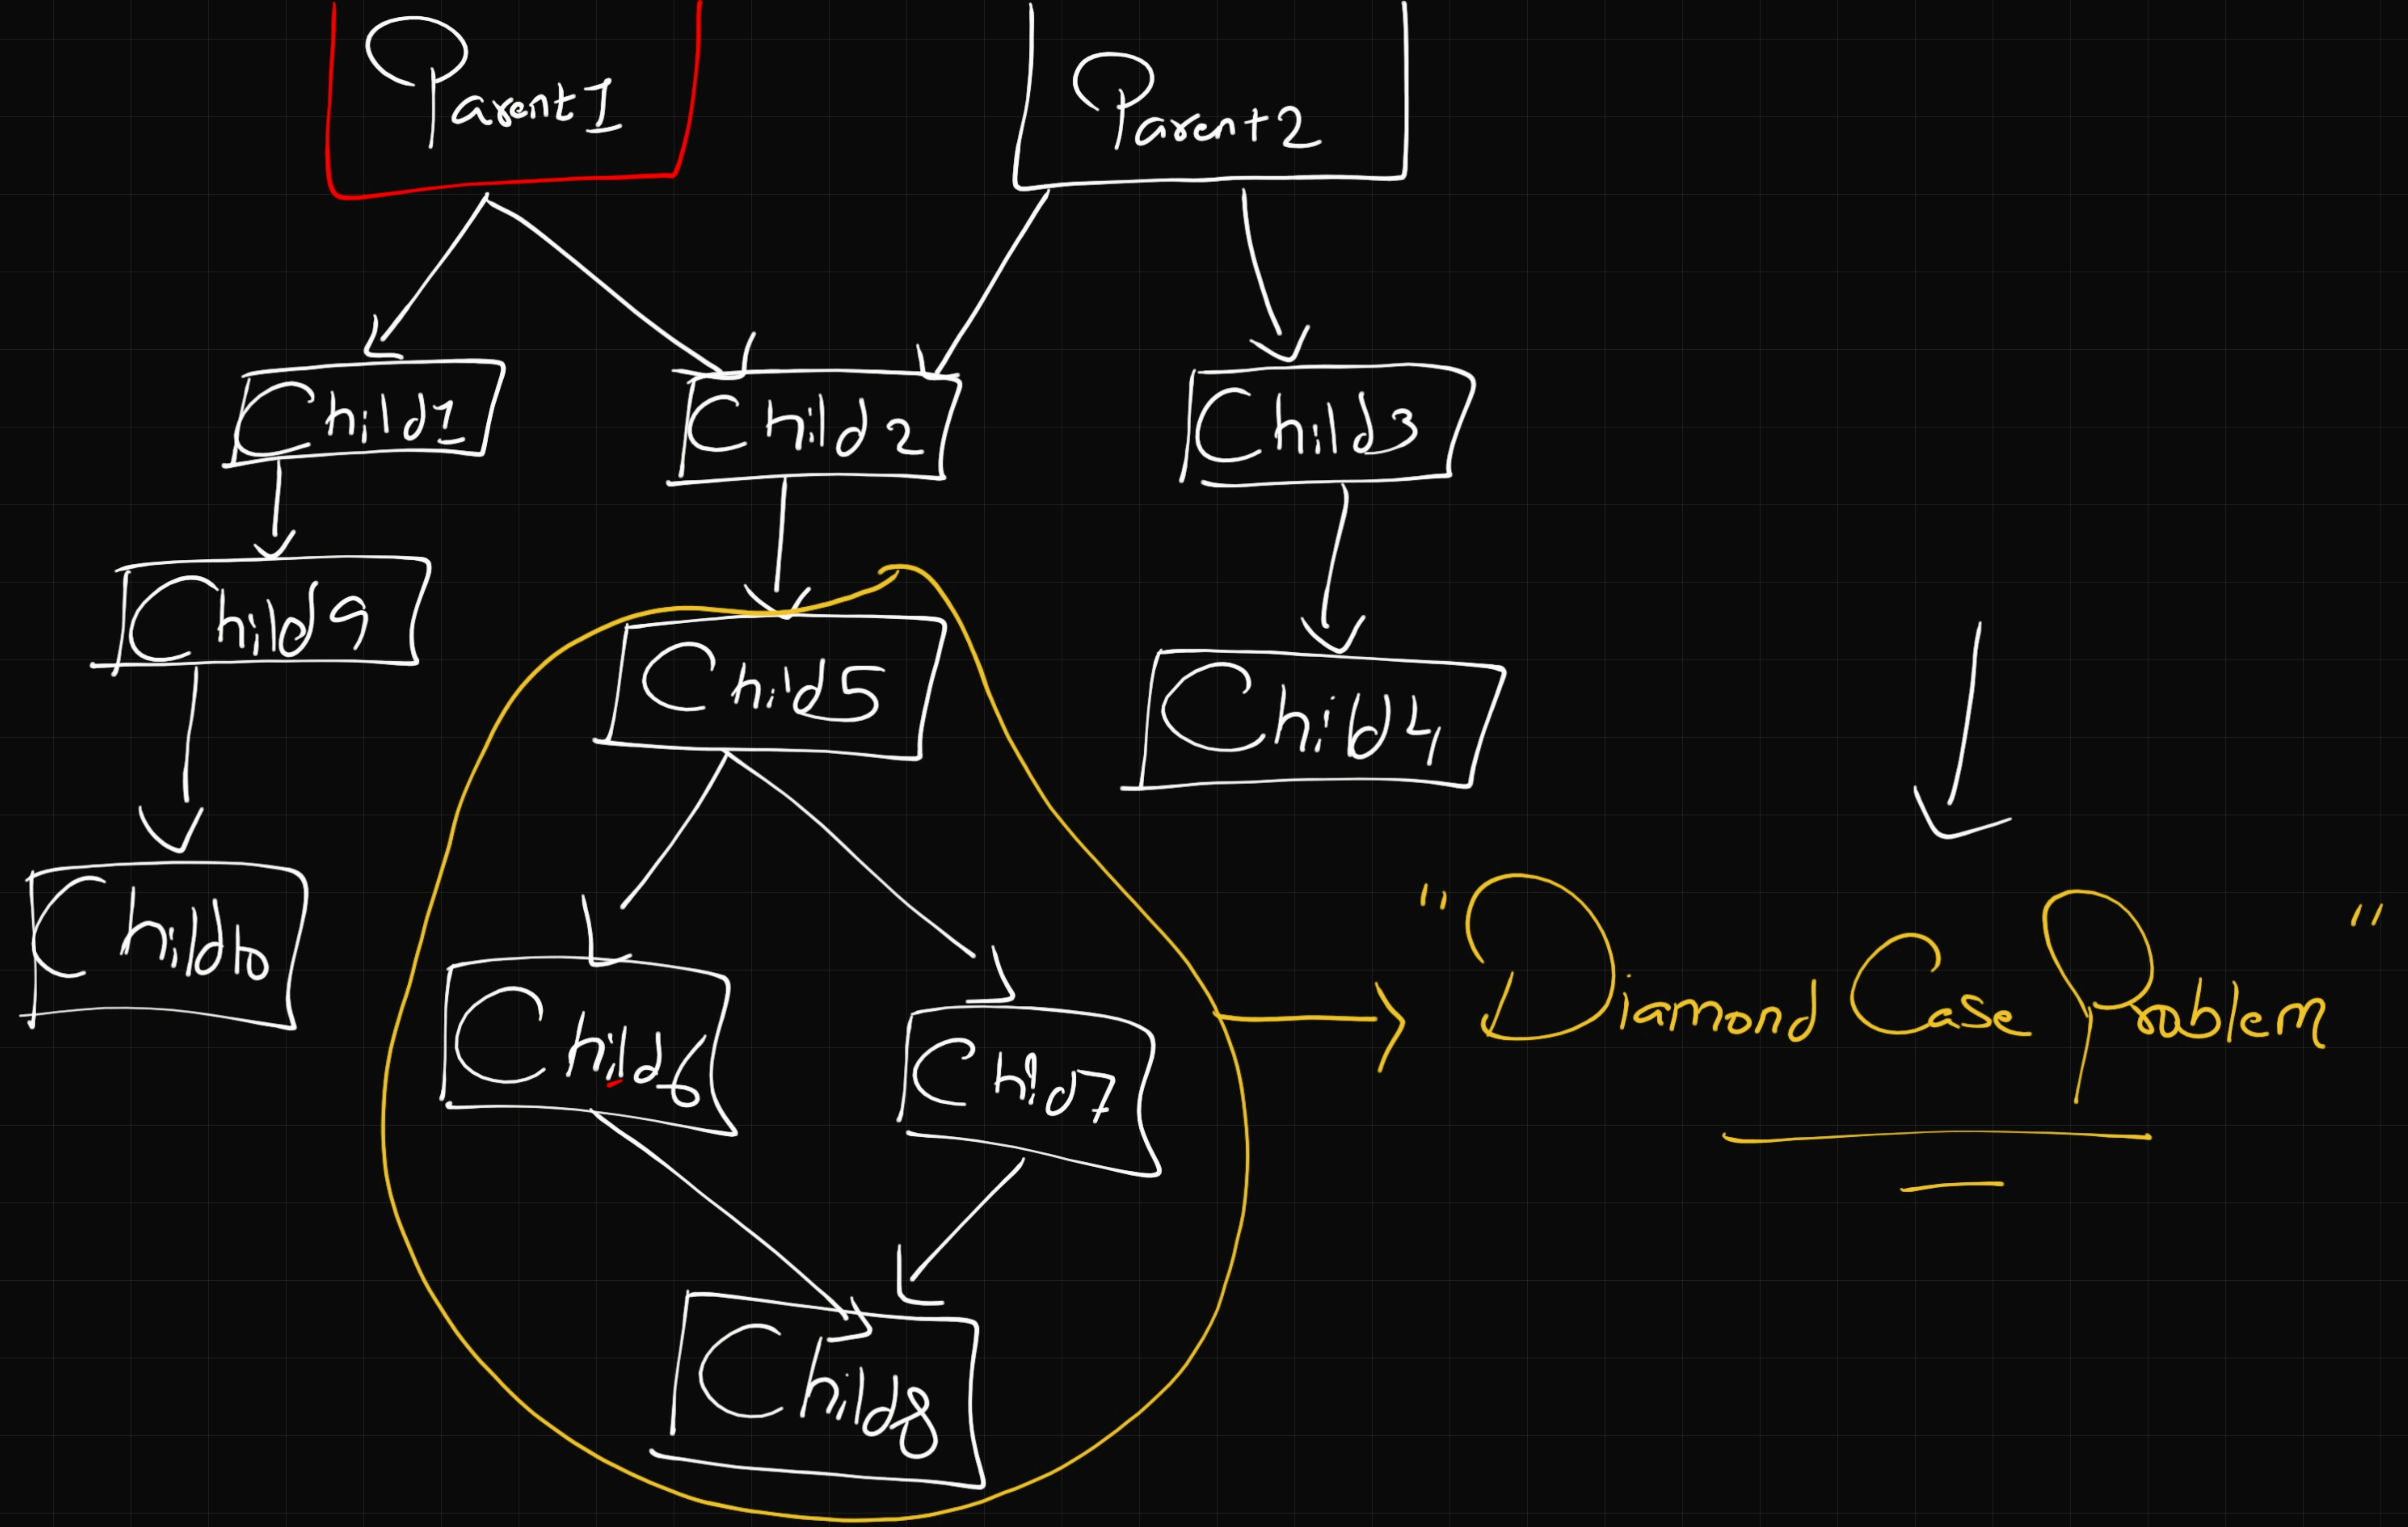

Class Log : Lenovo {;

Class Legion : Lenovo {;

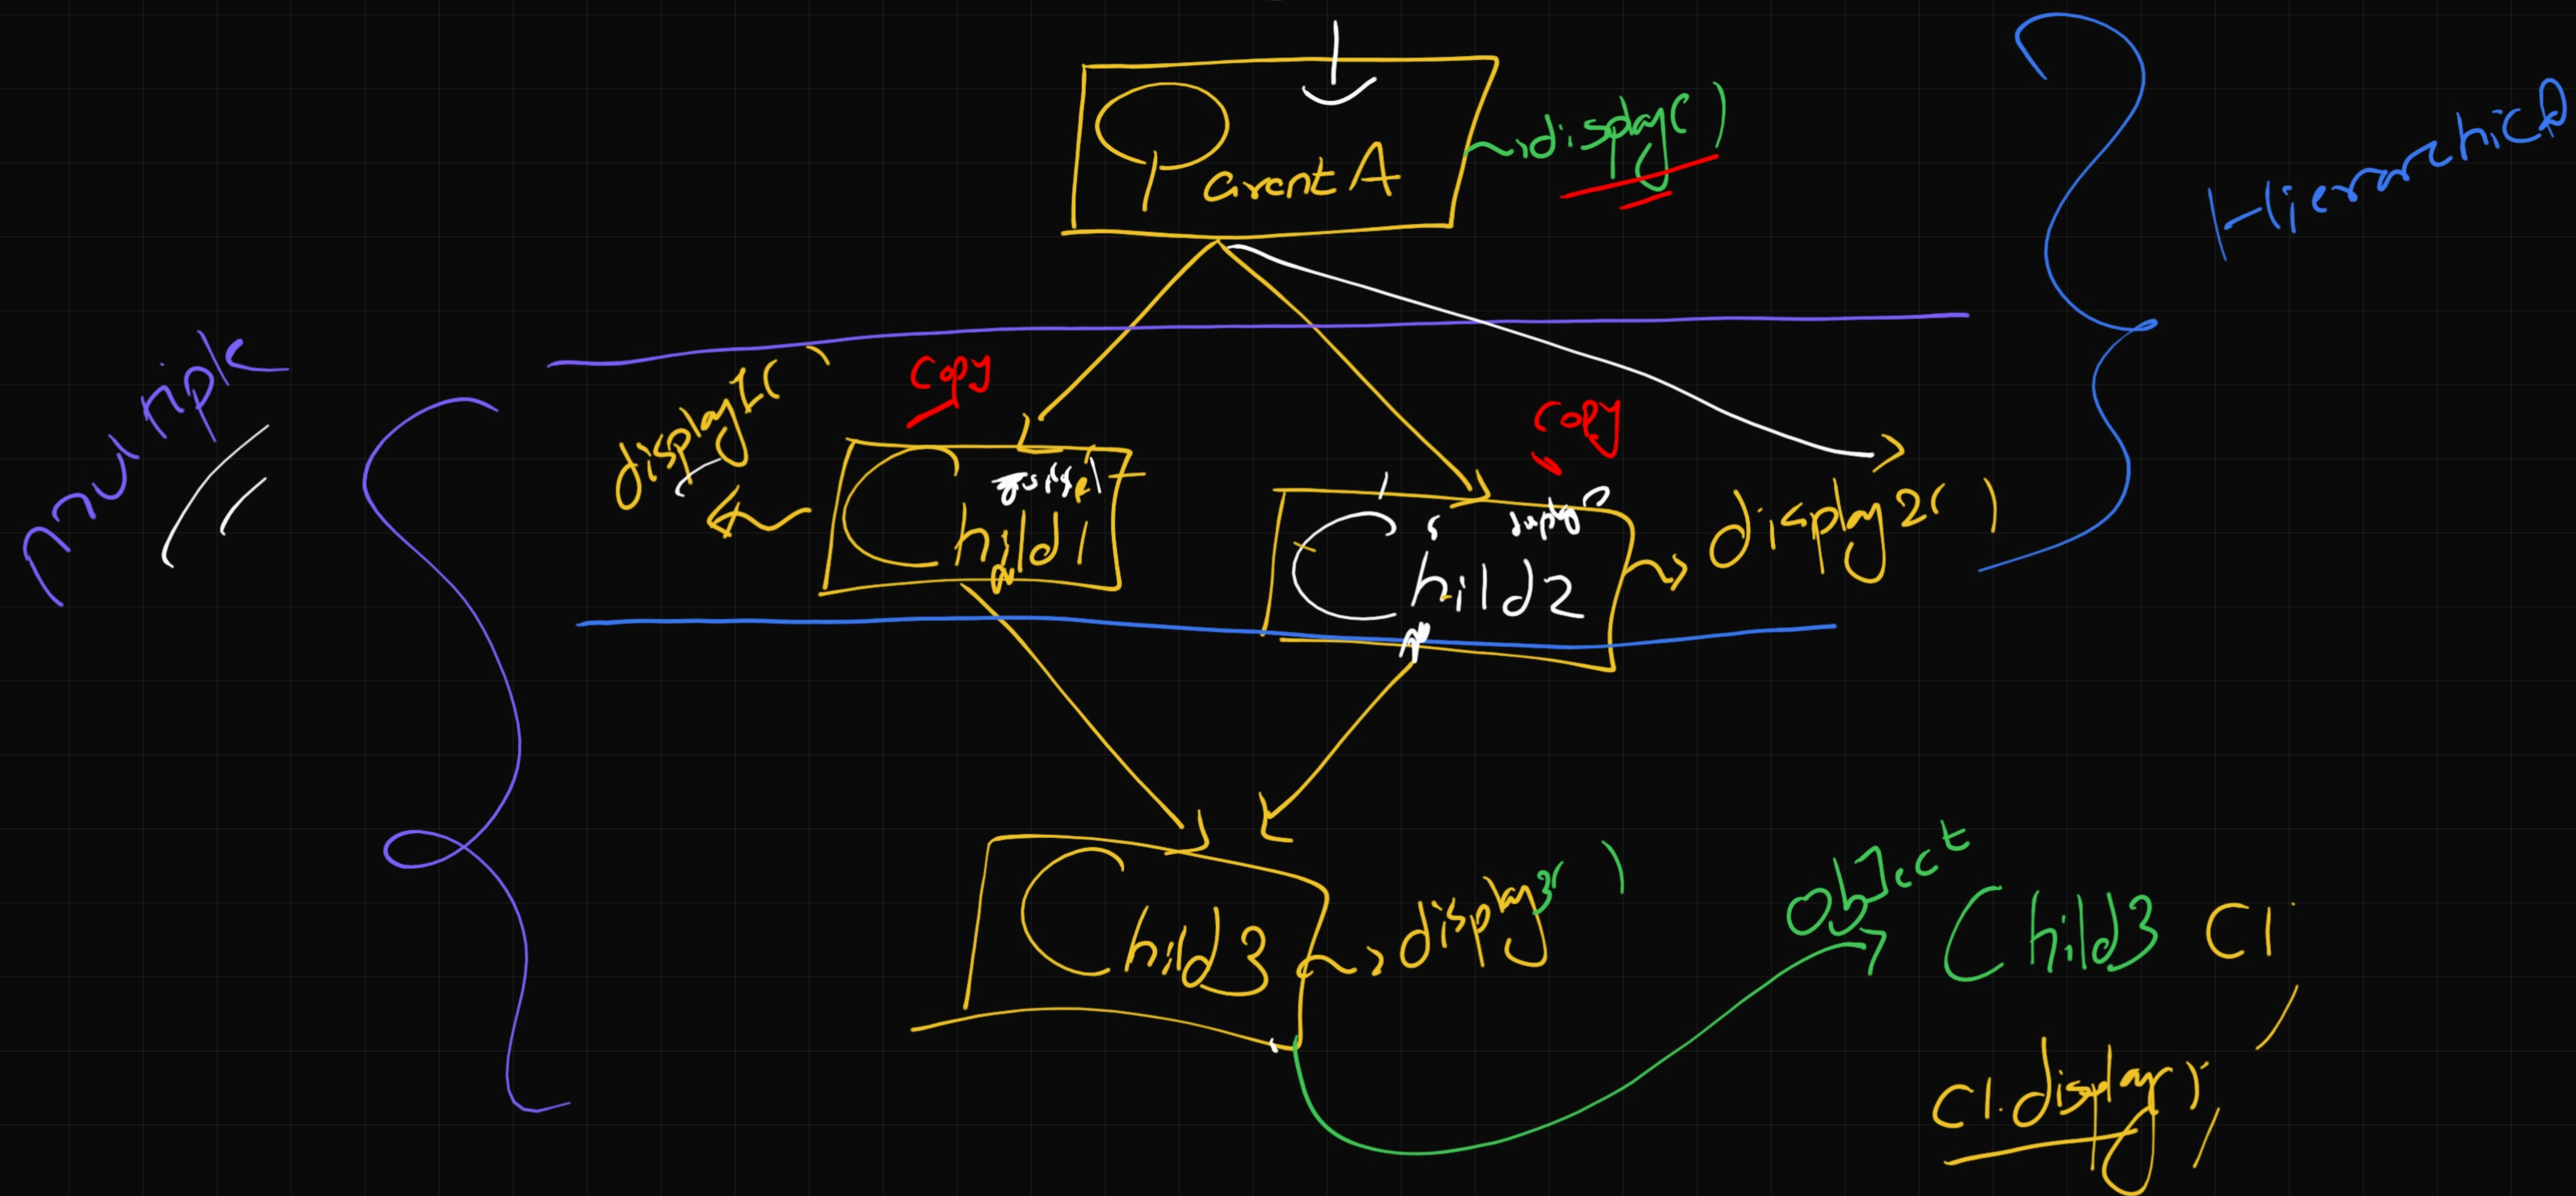

Hybrid Inheritance

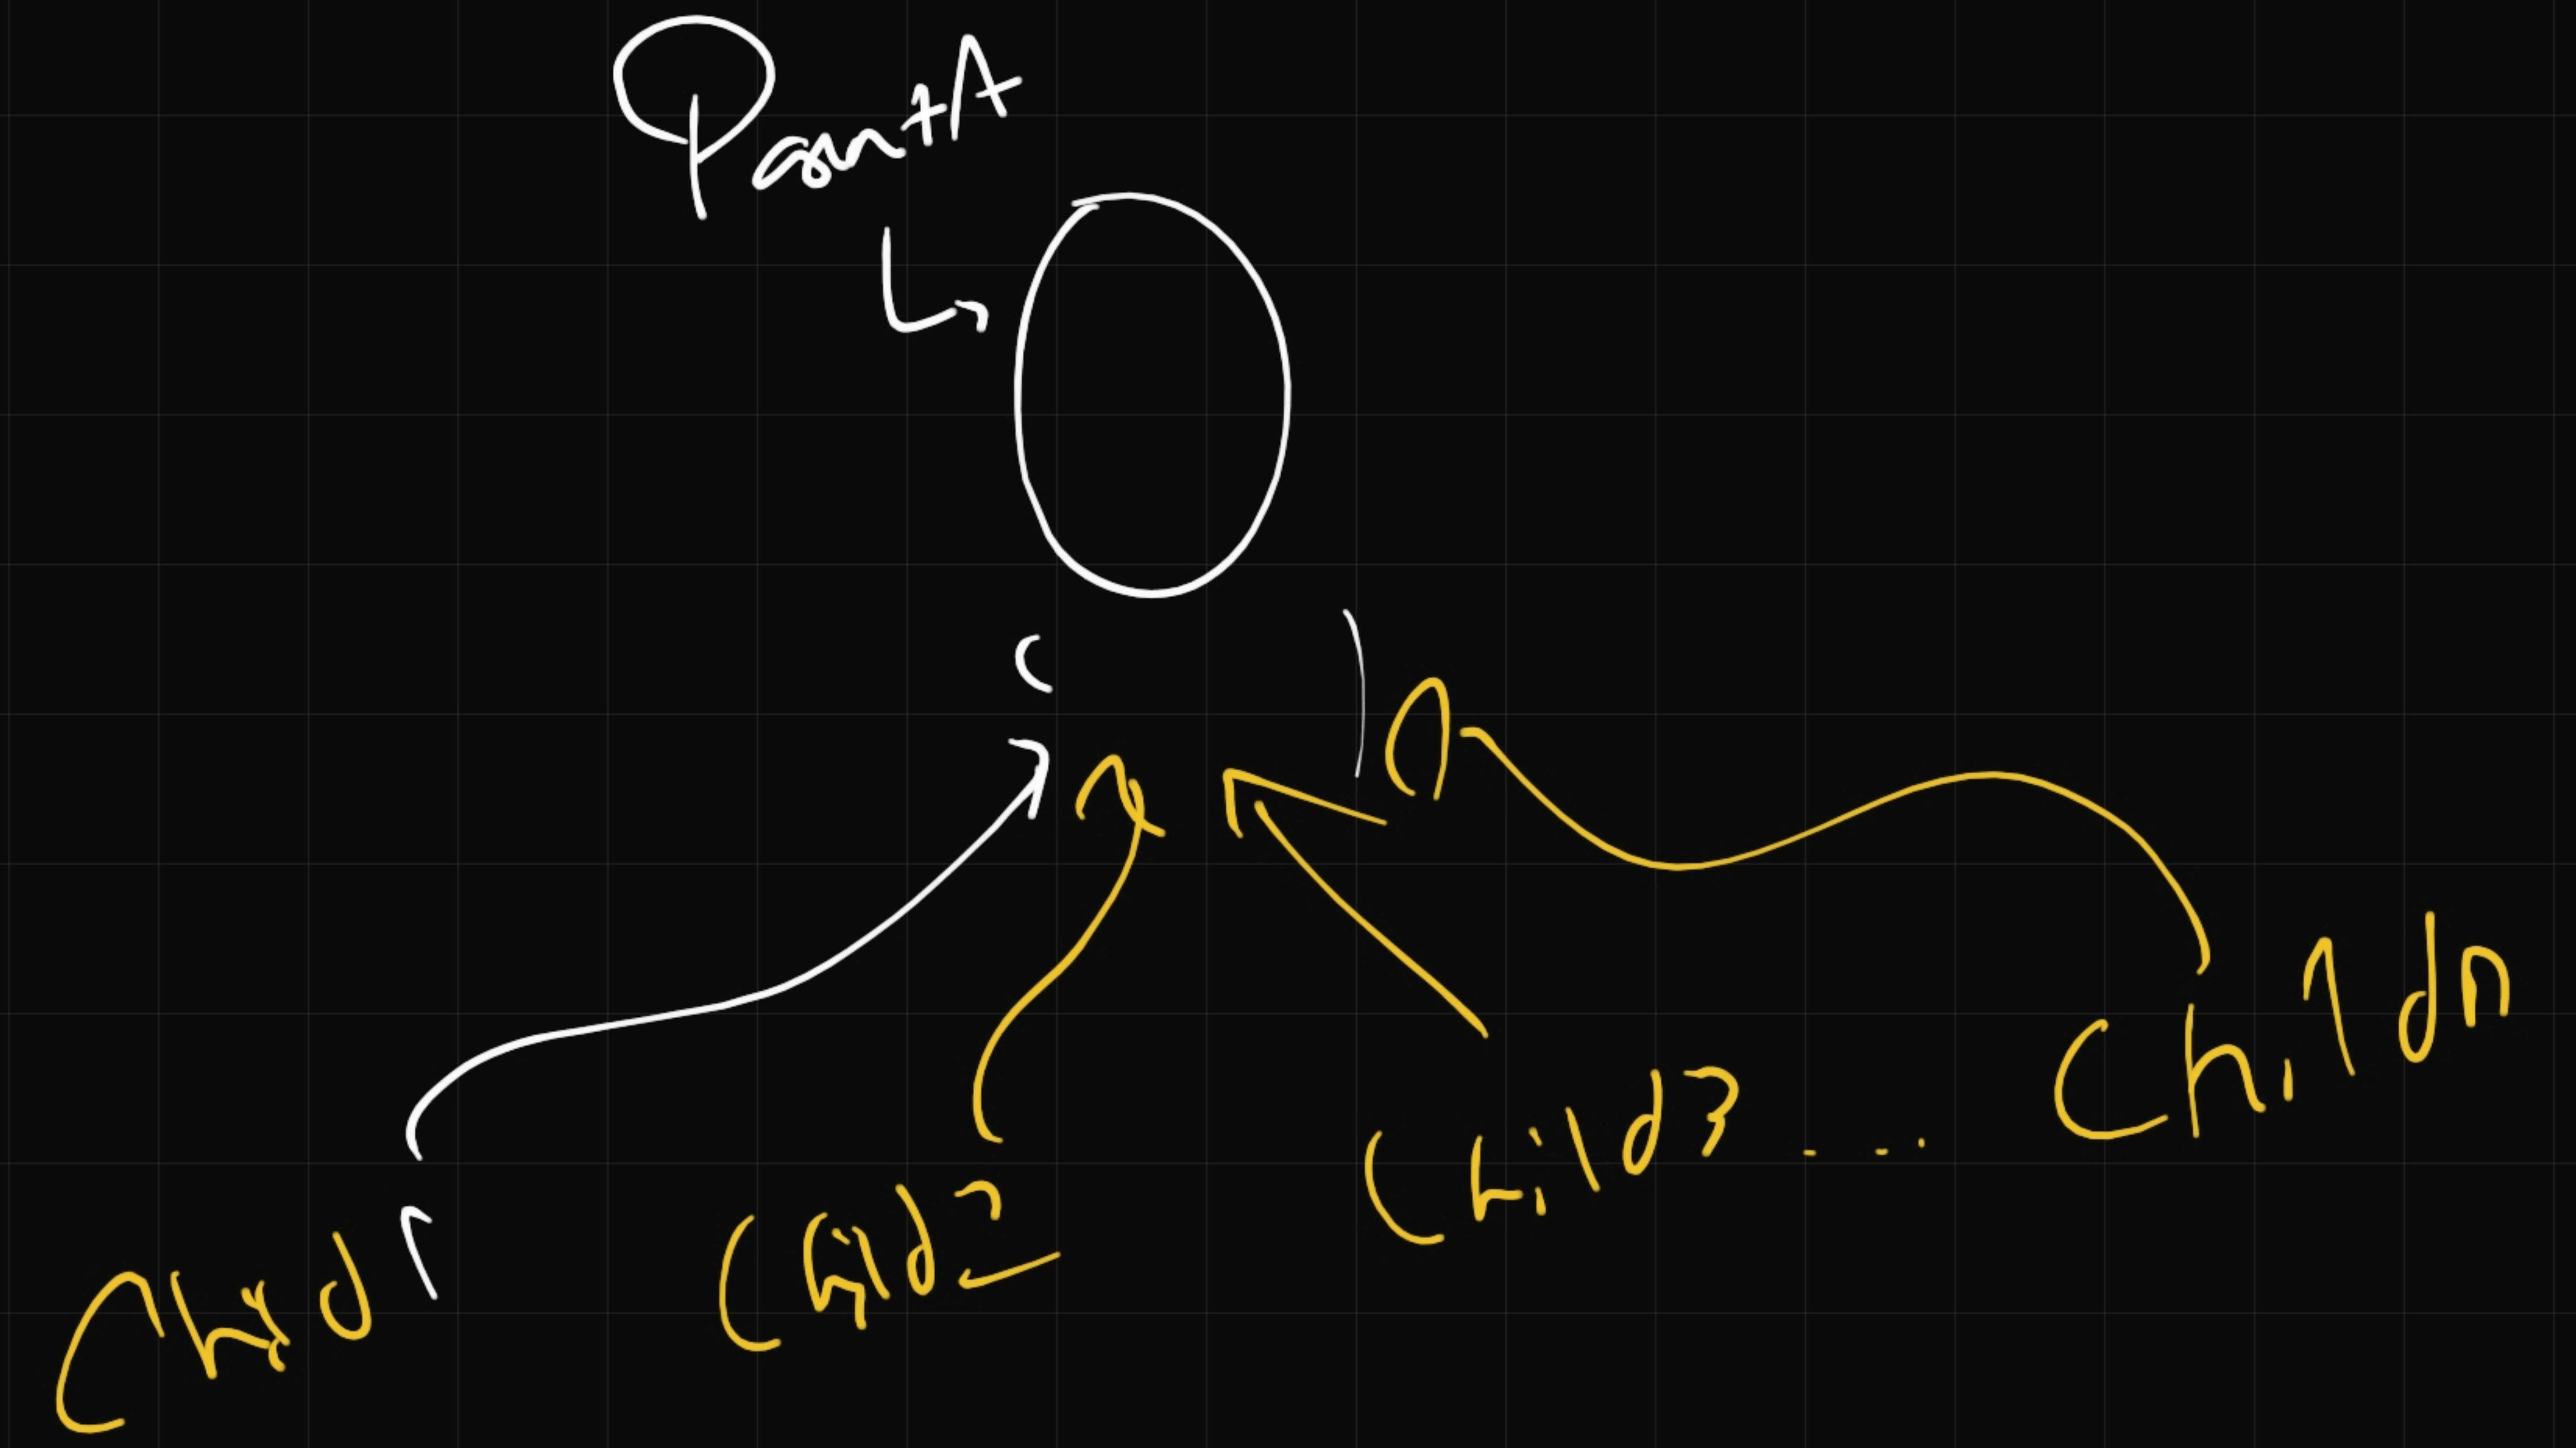

Diamond Case Problem

→ Virtual Keyword

Static Keyword

Class CreateObj {

// Data member

→ Static int Count = 0;

// Constructor

→ CreateObj() {

++Count;

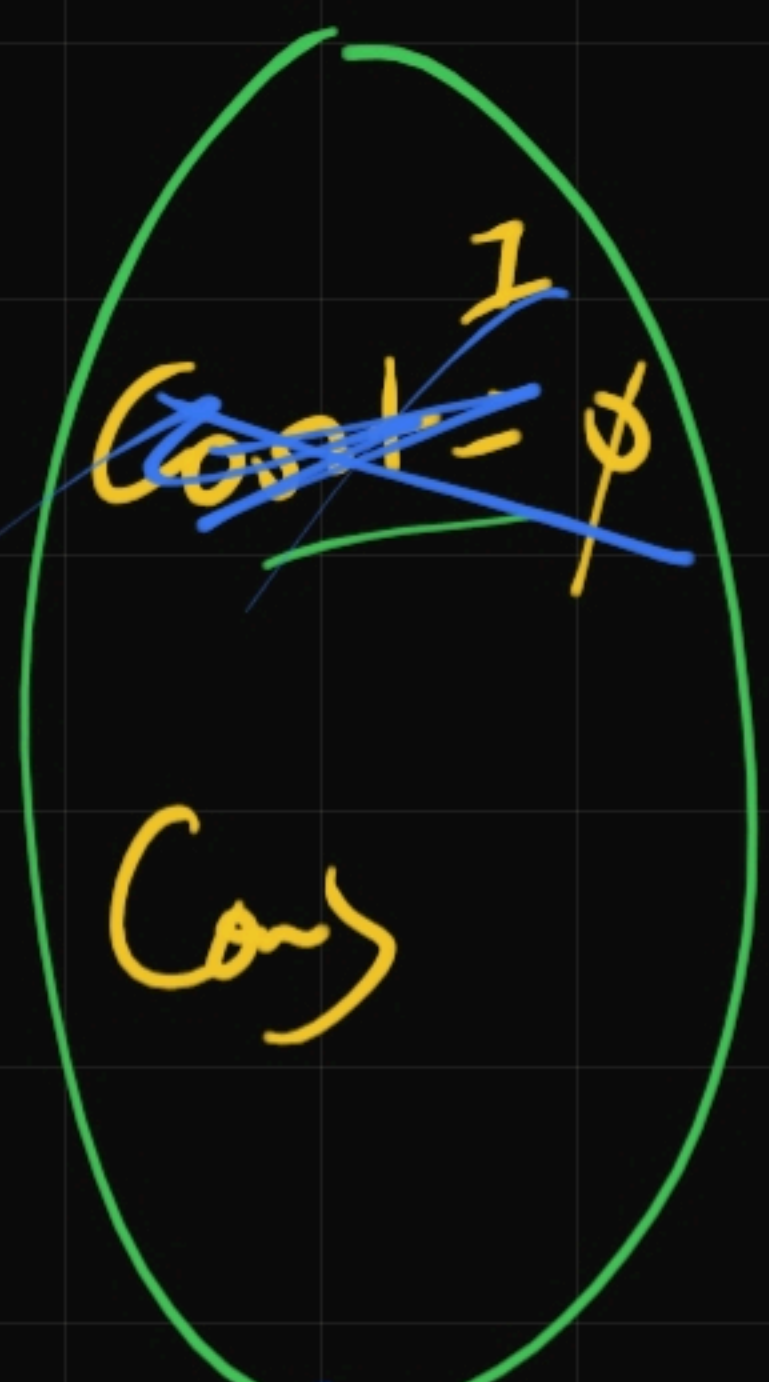

}

}

int main() {

CreateObj

obj1, obj2, obj3

obj1.Count

"Static" is a Keyword used in oops to make any members

Static so that the members will belong to class not it's

object.
